PROFESSIONAL SUMMARY

M.Tech Computer Science graduate with hands-on experience building data pipelines using Python, SQL, PySpark, Databricks, Delta Lake, and Apache Airflow. Built incremental ETL pipelines with Medallion Architecture, data-quality validation, quarantine workflows, deduplication, and Delta MERGE/upserts. Seeking entry-level Data Engineer / ETL Developer opportunities.

EDUCATION

Master of Technology (M.Tech) | Computer Science and Engineering 2024-2026 | CGPA: 9.15/10
Vaagdevi Engineering College, Warangal (Affiliated to JNTUH)

Bachelor of Technology (B.Tech) | Computer Science and Engineering 2019-2023 | CGPA: 7.7/10
Vaagdevi Engineering College, Warangal (Affiliated to JNTUH)

TECHNICAL SKILLS

Programming Languages:	Python, SQL, Java
Databases:	MySQL
Data Engineering:	PySpark, ETL/ELT, Data Cleaning, Data Transformation, Data Quality & Validation, Databricks, Delta Lake, Medallion Architecture, Data Modeling, Incremental Processing, Auto Loader
Orchestration:	Apache Airflow, Databricks Workflows, Job Scheduling
Cloud:	AWS S3
Data Analytics:	Pandas, NumPy, Exploratory Data Analysis (EDA), Feature Engineering, Data Visualization
Business Intelligence:	Tableau, Microsoft Power BI
Backend & APIs:	Flask, REST APIs
Developer Tools:	Git, GitHub, MySQL Workbench, VS Code, MS Excel, Jupyter Notebook, Linux
Core CS:	DBMS, Data Structures & Algorithms, Object-Oriented Programming (OOP)
Soft Skills:	Analytical Thinking, Problem-Solving, Attention to detail, Adaptability, Communication

PROJECTS

E-Commerce Incremental ETL Pipeline

Project Link: github.com/mdaliuddinhyder04/Ecommerce-Data-Engineering-Pipeline.git

Python · SQL · PySpark · Databricks · Delta Lake · Apache Airflow

- Built an end-to-end incremental ETL pipeline for customer, order, and order-item data using PySpark, Databricks Auto Loader, and Delta Lake.
- Implemented Bronze, Silver, and Gold Medallion Architecture with data cleansing, type standardization, deduplication, Delta MERGE/upsert processing, and incremental ingestion.
- Developed data-quality validation and quarantine workflows, including referential-integrity checks and quality gates to prevent invalid data from reaching analytics tables.
- Created analytics-ready Gold datasets for order, customer, product, and daily sales analysis, and orchestrated Databricks Job execution through Apache Airflow.

Hierarchical Resource Intelligence for Multi-Tier IoT Allocation

Project Link: github.com/mdaliuddinhyder04/Hierarchical-Resource-Intelligence-Iot.git

Publication (IJIEE): [ijee.org/index.php/ijee/article/view/1185](https://www.ijee.org/index.php/ijee/article/view/1185)

Python · Pandas · NumPy · Scikit-Learn · TensorFlow · Flask

- Engineered and integrated multi-tier telemetry features (CPU, memory, latency, bandwidth, jitter, workload, execution time) across Cloud, Edge, and IoT data sources into a unified dataset for resource-allocation modeling.
- Performed exploratory data analysis and comparative evaluation of five modeling approaches (Decision Tree, Random Forest, Gradient Boosting, DQN, and a Hybrid BiLSTM Ensemble), achieving 98.25% classification accuracy and R^2 of 0.977 with the best-performing model; published in IJIEE.
- Built a Flask-based application supporting EDA, model training, and both single-record and batch-CSV prediction workflows.

INTERNSHIPS

AI & Machine Learning Intern - AWS Academy

May-Jul 2023 | Remote

- Worked through structured, hands-on assignments covering the end-to-end ML workflow - data preparation, model development, validation, and performance evaluation using Python tools.
- Applied data-cleaning and validation techniques using Pandas to prepare datasets for downstream model training, strengthening practical exposure to data-quality considerations before modeling.

Salesforce Developer Intern - SmartInternz

Aug-Oct 2023 | Remote

- Applied Salesforce development and CRM concepts through hands-on configuration, customization, and business process automation.
- Gained practical exposure to CRM data management, security, testing/debugging, and Salesforce organizational configuration.

CERTIFICATIONS

SQL (Advanced) - HackerRank (Aug 2026) | **Data Analytics Essentials** - Cisco (Mar 2026) | **Cloud Foundations & Machine Learning** - AWS Academy (May 2023) | **Database Programming with SQL** — Oracle Academy (Apr 2022)

ACHIEVEMENTS

- Finalist, Smart India Hackathon 2022 – Selected among 100,000+ student teams.
- Finalist, Oracle APEX Build-A-Thon 2022 – Selected from 1,100+ entries across 50+ institutions.
